Add:No.9 Jieshun Road, Nancun Town, Panyu District, Guangzhou City,Guangdong Province,China

## About us

GUANGZHOU PAPER-MADE HOMELAND TECHNOLOGY LTD is a high-tech paper furniture manufacturer who aims to product development,design,completing with selling the furniture which made by a material of recycle paper tube. For years, our founder has been adhering to the concept of "leaving us a green land and a blue sky". We wish all people can pay attention to the harm of formaldehyde, and the benefits of recycle economy, so that a large number of paper furniture come into applications, let kids far awayfrom formaldehyde furniture.

After five years of development, now our paper furniture main include:

- 1\kid's furniture for kindergarten\nursery school\home
- 2\Display shelf for fairs \home\office space

There are blue sky,green trees, white clouds! We are leisurely lying in the arms of nature...seeing the moon, large number of stars ...no haze, no masks, only beautiful scenery,healthy life, my dream - Paper-Made Homeland!  
As the pioneer of the furniture market,we welcome more partners who have the passion for the paper furniture , to chase a better future together!

[www.zhizaojiayuanchina.com](http://www.zhizaojiayuanchina.com)

Can you image that you can stand on a empty tube but just made by paper?

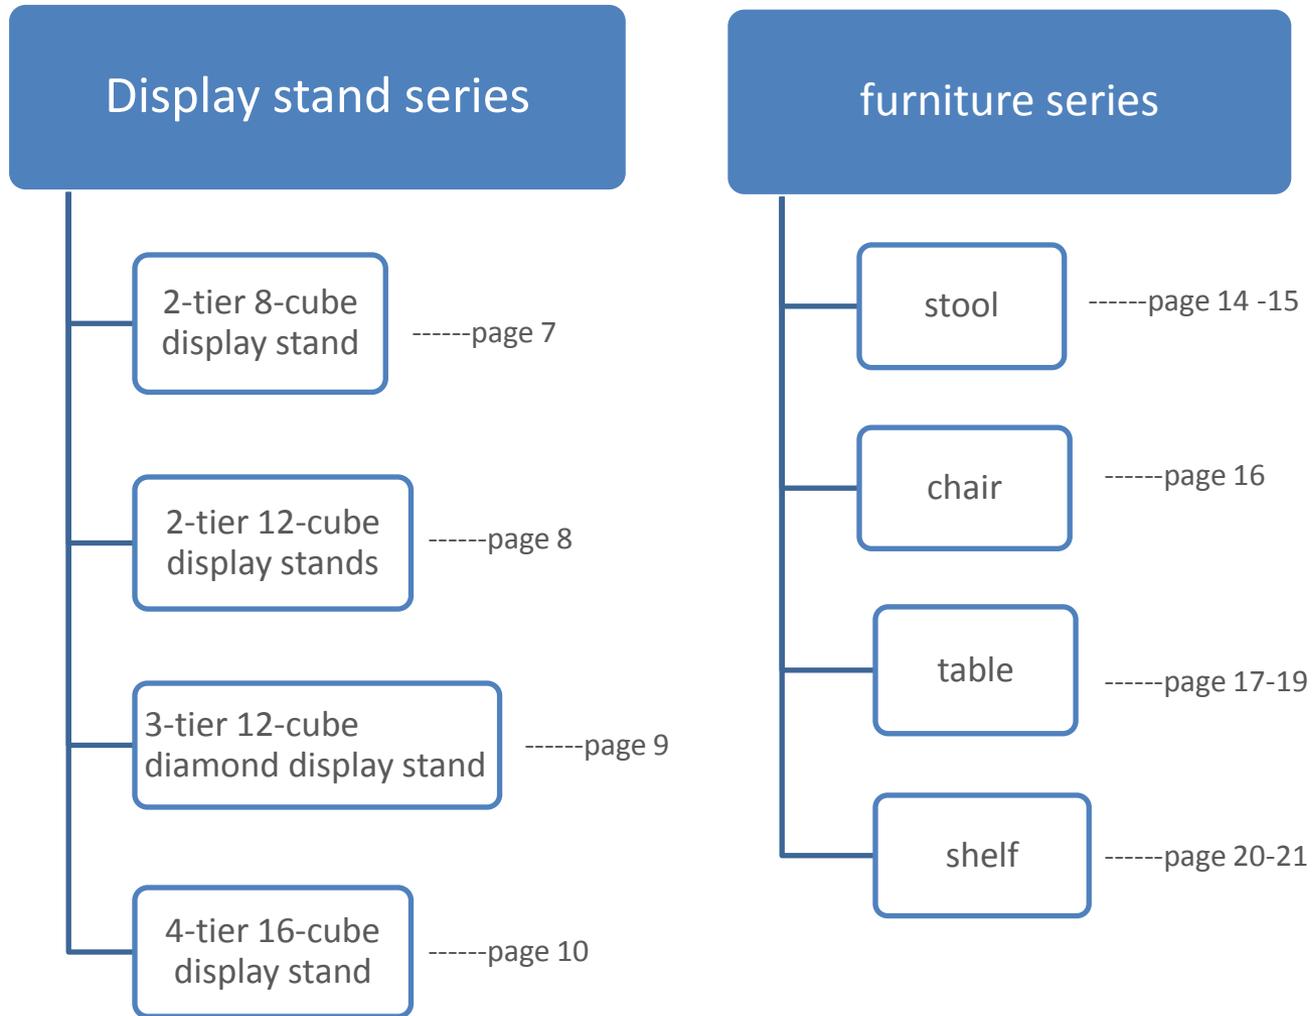

This is our main material to make paper furniture,weight capacity as wooden .

Why it can be so load bearing? Because it is made by our patented machine invented by our factory.

We Have researched over 12years before it came out officially.

# Our main product

## Display stand series

# 1. Good weight capacity

Can you image that a shelf can put a object over 25kg but it just made by paper?

## WEIGHT CAPACITY

each grid  
**> 20kg**

frame made by paper  
+  
PVC connection parts  
+  
melamine board  
=weight capacity over 20KG

## 2.Easy to install and detachable—don't need any tools

### Step 1

Do you think you need 1 minute to insert the left and right legs ?

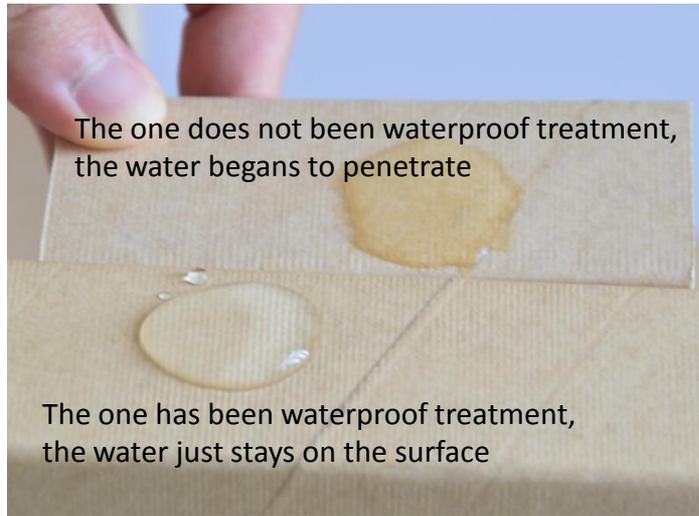

Will this little shelf takes you 8 minutes to install?

# Question:

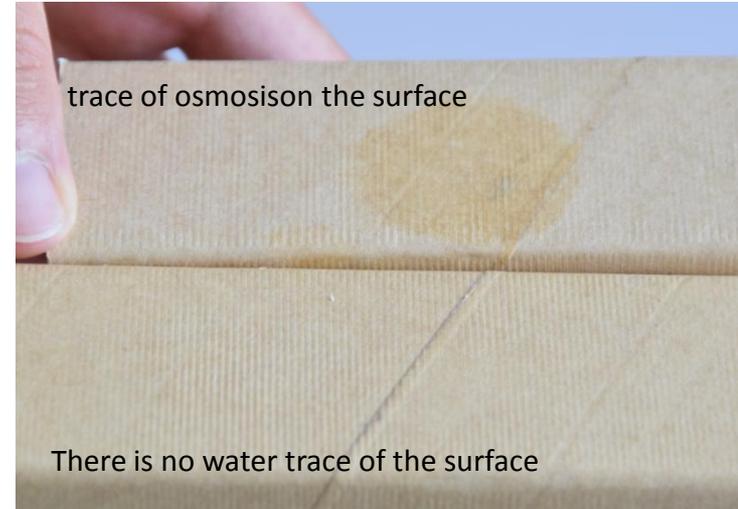

## 1.Can these kids furniture be water proof?

Sure. We have done a waterproof treatment on the surface of the product.

When the paper tube encounters water

After wiping the surface with a tissue

## 2.Can these furniture be long-time used?

Sure.Our product can be generally use for 5 years, even longer if been taken good care.

It is not a artwork,it is a durable product!

Any question please feel free to contact us!

**12** years of paper products equipment research,

**10** years product structure development,

Makes our high weight capacity paper furniture.

There are blue sky, green trees, and white clouds! There is no haze, no masks, only beautiful scenery, healthy life, my dream - Paper-Made Homeland!

We have researched and developed the paper tubes equipment over 12 years, and over 10-year development about the product! Our founder Mr Wang always obsesses with the production of paper tube materials, research and development of paper tube products. He insists that the paper can become a durable and eco friendly furniture! Return a piece of green space and a blue sky, a safe space for kids, so that many families can afford the eco friendly and healthy furniture ...

The firm faith with the power of dedication, makes Mr Wang have successfully developed our kindergarten furniture, furniture for children's space in the passed 10 years. In the passed decade, these products gradually develop from the rough contours to brief structure then became the durable paper furniture. The service life and performance of our paper furniture has been gradually verified as time went by. They can be against the wet and dry environment. Their service life is about 5 years. If been taken good care, it will be longer. We make paper furniture by heart.

From the simple frame structure, then connected with pvc connectors, came into the splice structure reference from wood, we finally developed the patented unique paper structure. We have been running on the road, we have been innovating, we have been keeping moving forward...

It is because of the firm faith that we can develop our excellent products.

Our customers use paper furniture more assuredly, in that we make the products by heart.

## **Does wood furniture durable than paper furniture? Do not.**

We often think that wood is hard, so the furniture made with wood is also durable. Really?

As we know, wooden furniture needs metal connections, such as screws. But metal and wood are not the same material, after using wooden furniture for days, the screws will be loose, resulting in the damage of the structure, and then product damaged.

However, our paper furniture use the splice structure to connect the product, they are the same material connected, even if the thermal expansion and contraction happen, all the material can also be scaled in the same proportion to keep the structure firm, and make it structure stable ,durable. Will you still think our paper furniture can not be durable?

With the emphasis on eco-friend and health, our paper furniture will go farther and farther. It is a healthy furniture. It is a recycle furniture.

**ATTENTION: Because of modular structure design for our furniture ,when product damaged, you just ask us to send a part to replace the damaged part, that's will make the service life longer for our furniture. Normal service life is five years, but it can be longer if has been taken good care.**

**You can paint the color you want, because it is not a problem to paint on the paper.**

**Welcome contact us!**
